

LED AREA FLOOD LIGHTING

STREET LIGHTING

IS6

Incorporating Dual Driver Technology (DDT), impact resistant polycarbonate lens and the latest high brightness LED chips, the IS-6 is the most reliable LED car park fixture on the market. Best of all, you'll never be left in the dark if a driver fails.

LED AREA FLOOD LIGHTING

IS6

DOUBLE DRIVERS = PEACE OF MIND

Unlike conventional LED fixtures, the IS-6 incorporates 2 x LED Drivers. Regular LED fixtures run on one driver, so when it fails; you are left in the dark. The dual driver technology in the IS-6 means if a driver does happen to fail, you still get 50% of the light from the fixture while the fault is easy to identify.

NO LOSS OF LIGHT

The IS-6 maintains spare capacity while running the LED chips. If one module fails, the driver will automatically redistribute the power to the remaining two modules on the circuit to maintain 100% light output. However, the fault is still readily identifiable and can be rectified easily.

LESS LANDFILL

The Drivers, The LED Chips and the Lens are ALL replaceable. Most conventional LED fixtures do not have replaceable parts which means you throw away the whole fixture and increase land fill.

LOW GLARE

Unlike conventional LED Fixtures the IS-6 chips are fitted with a specially designed optical lens as well as a polycarbonate prismatic lens to diuse light in a variety of directions to reduce glare.

EASY MOUNT BRACKET

With the patented quick release bracket system, installation and maintenance is a breeze.

INCREASED SAFETY

The IS-6 is also available with a wireless or hard wired emergency unit.

IS6

APPLICATIONS

Thanks to the IS6's unrivaled performance and longevity, along with the range of models in the series, it can be utilised in a range of vastly different settings.

IS6 - 60W

DIMENSIONS

DETAILS

- 5 YEAR WARRANTY
- ULTRA HIGH EFFICIENCY 60W LED SYSTEM (240V)
- DUAL DRIVER TECHNOLOGY (DDT)
- SUITABLE TO REPLACE 70W - 150W METAL HALIDE FIXTURES
- REPLACEABLE LED CHIPS
- 50,000 HOUR LIFE ELIMINATES MAINTENANCE
- WEATHERPROOF DESIGN (IP65)
- UNIQUE LOW GLARE TWIN OPTIC SYSTEM
- MARINE GRADE ALUMINIUM HOUSING DELIVERING OPTIMAL THERMAL MANAGEMENT
- SEPARATE OPTICAL AND DRIVER CHAMBERS
- STAINLESS STEEL FASTENERS AND COMPONENTS
- SUITABLE FOR THROUGH WIRING FOR EASY INSTALLATION
- IMPACT RESISTANT POLYCARBONATE LENS
- COMPLETE WITH QUICK-FIT MOUNTING BRACKET
