

LED AREA FLOOD LIGHTING

BAY LIGHTING

# SEGA

series

The SEGA series from Lighting Technology International provides a durable and high quality yet light weight and affordable solution for low bay lighting. With the state of the art LTI colling technology and optimised distrubution, the SEGA series suits a variety of applications including, warehouse, production, parking lots etc.

## SEGA series

### UNRIVALED EFFICACY

The SEGA series harnesses the reflector technology to produce unrivaled efficiency and efficacy, up to 145lm/W.

### COOLING TECHNOLOGY

With quality heat sinks, high grade aluminium and an intelligent design to promote natural convection the SEGA series extends its life way beyond the norm.

### OUTSTANDING DURABILITY

Designed with corrosion, weathering and rough handling in mind the SEGA series undergoes a variety of stress tests to ensure it meets all requirements needs and more.

### POWERFUL LED AND REFLECTOR TECHNOLOGY

The SEGA series utilises a unique reflector technology to distribute light which improves not only efficacy but also allows the SEGA to be aimed with extreme accuracy.

### EXCELLENT LIGHT DISTRIBUTION

Throughout the different models and specifications of the SEGA series there is a variety of beam distributions all which have been designed to maximise illumination.

### OPTIMISED FOR WIRELESS CONTROL

Each SEGA is capable being controlled wirelessly. As the SEGA is an LED this means not only can it be remotely turned on and off but also dimming up and down. This cuts down on infrastructure costs

### REPLACEMENT FOR HID FLOODLIGHT

The SEGA series was designed specifically to replace its metal halide counterpart while providing a 60% reduction in ongoing power costs.

# APPLICATIONS

Thanks to the SEGA's unrivaled performance and longevity, along with the range of models in the series, it can be utilised in a range of vastly different settings.
